

# ***SAFE FOR THE ENVIRONMENT. BEFORE AND AFTER USE.***

**WHITZORB<sup>®</sup>**

WhitZorb is the green alternative for absorbing and biodegrading spilled hydrocarbons and other materials. It contains oil-eating microorganisms that are harmless to human and animal life. These microbes consume gasoline, diesel, crude oil, grease, paint thinner, acetone and more. Independent tests have shown that within 7 days the saturated hydrocarbons biodegraded 94.3% and converted mostly to CO<sub>2</sub> and water. Aromatic hydrocarbons biodegraded 92.5% in 28 days. Over time, the microbes also consume non-hydrocarbons such as grease thickener and metals. For spills on soil there is no need to remove the product and spent WhitZorb from factory spills can be disposed of in a landfill or incinerated.

*Certified by the USDA as 100% BioBased.*

# ABSORBENT

Compared to polymer-based absorbents, WhitZorb is significantly faster in absorption, requires about 80% less product for the same size spill and does not create a paste when cleaning up the spill. Compared to clay-type absorbents, WhitZorb requires 50% to 75% less product. It can be re-used until it is fully saturated.

**WhitZorb** is much more than a mere absorbent for spilled oil and grease. It is also a bioremediation agent. Derived from wood waste containing microbiological cultures; it degrades or detoxifies environmental contaminants that are hazardous to health or the environment. These are converted into less toxic forms.

WhitZorb is a dehydrated product that must be hydrated with an equal amount of water for maximum effectiveness to bioremediate hydrocarbons. Hydration can be accomplished with fresh or sea water. It expands 3 times the original volume with fresh water and 1.5 times with salt water.

*Independently run test reports are available upon request.*

Approved by the US Environmental Protection Agency (EPA).  
Certified by the USDA as biodegradable.

**Packaging:** WhitZorb - 75-25 lb. Bags, Super Sack - approx. 2000 lbs.

- **Environmentally Friendly**
- **Absorbs and biodegrades**
  - Crude oil
  - Lubricating oil and grease
  - Gasoline
  - Paint thinner
  - and more
- **Quick and easy to use**
- **Approved by the federal government for clean up and bioremediation of hydrocarbon pollutants**
